

Demo: Loading Macros via include shortcode

This page demonstrates the include-shortcode strategy for loading macros. The YAML front matter of this file includes:

```
format:
  html: default
  pdf: default
  revealjs:
    output-file: demo-shortcode-slides.html
  docx: default
```

Example math

The table below uses macros defined with `\def` in `macros.qmd`, which work in all output formats that support MathJax or LaTeX:

Description	Code	Output
Greek: alpha	<code>\$\$\a\$</code>	α
Greek: beta	<code>\$\$\b\$</code>	β
Greek: gamma	<code>\$\$\g\$</code>	γ
Greek: lambda	<code>\$\$\l\$</code>	λ
Greek: sigma	<code>\$\$\s\$</code>	σ
Log-likelihood	<code>\$\$\llik\$</code>	ℓ
Independent	<code>\$\$X \ind Y\$</code>	$X \perp\!\!\!\perp Y$
IID distributed	<code>\$\$X_i \siid \Normal(\m, \ss)\$</code>	$X_i \sim_{\text{iid}} N(\mu, \sigma^2)$
Vector: mu	<code>\$\$\vm\$</code>	$\tilde{\mu}$
Hat beta	<code>\$\$\hb\$</code>	$\hat{\beta}$
